

Embedded World 2025 A Journey of Innovation!

Embedded World 2025 was an extraordinary event, from unveiling next-generation **System on Modules (SoMs)** and **Single Board Computers (SBCs)**, to demonstrating **cutting-edge FPGA** and **AI-driven solutions**, iWave booth was a hotspot for groundbreaking technology and insightful discussions.

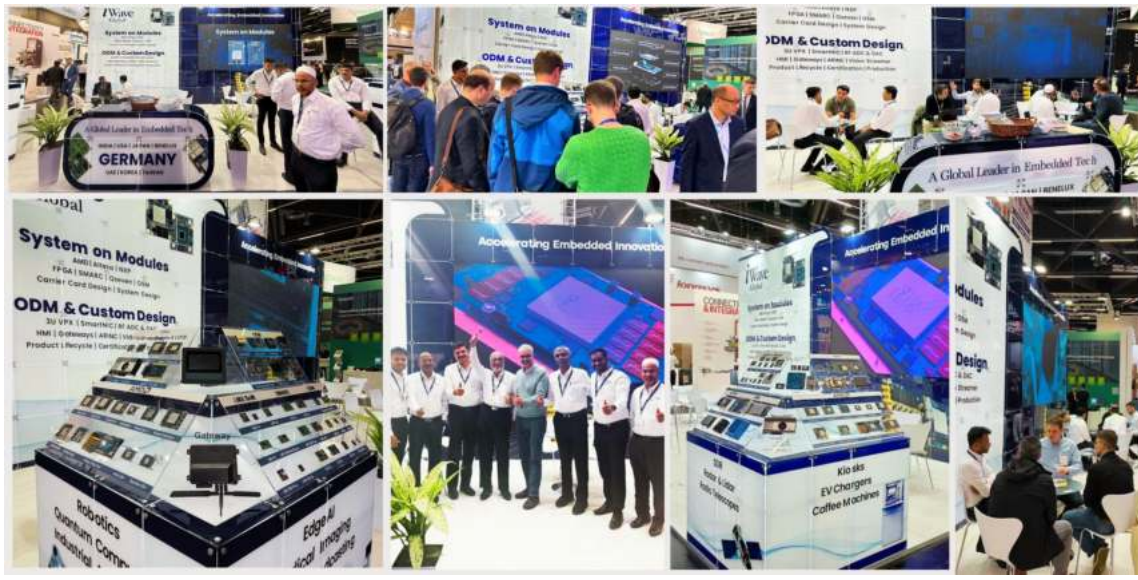

Our booth was filled with excitement as new **product launches** and **live demos** took the center stage. Visitors experienced real-time demonstrations, explored our diverse product portfolio, and engaged with our experts to uncover how our solutions are shaping the future of embedded technology. The event provided a fantastic platform for meaningful connections, collaboration, and innovation.

Key Highlights of EW 25

Product Launches

- ◆ **Versal AI Edge Gen2, Artix UltraScale+ & Spartan UltraScale+**, AMD's FPGA based system on Modules built in a small form factor designed for high-speed signal processing and AI applications
- ◆ **ZU48/ZU47/ZU43/ZU28/ZU25DR Zynq UltraScale+ RFSoc**, AMD's FPGA based system on Module and 3U-VPX Card for balancing the real-time processing & high-performance computing.
- ◆ **Agilex 3** and **Agilex 9 Direct RF** System on modules powered by Altera for AI and RF related applications.
- ◆ **Agilex 7** and **Agilex 9** 3U-VPX Cards for delivering high-performance computing with advanced transceivers and power-efficient AI acceleration.
- ◆ **MediaTek Genio 1200** System on Module powered by MediaTek consists of premium IoT SoC with an integrated NPU delivering high performance & AI-powered multimedia capabilities.
- ◆ **Edge Industrial Gateway** consisting of i.MX 93 applications processor integrates advanced Arm Cortex-A55 cores with an Ethos™-U65 microNPU for efficient edge AI processing.

Snapshots from Embedded World 2025

From the Booth to You: Embedded World 2025 Glimpses!

Our booth at Embedded World 2025 was a hub of innovation, packed with live demos, breakthrough product launches, and engaging tech conversations!

Exclusive first look at our product launches

From Nuremberg to Tokyo 🚀

Meet us at Japan IT Week Spring 2025!

Couldn't make it to Embedded World 2025? We've got you covered! Catch us at Japan IT Week 2025 from **April 23 – 25**, where iWave experts will be ready to showcase latest products, live demonstrations and innovations. Discuss with our team and get insights on how to build your next embedded project.
